## **Fuorisalone 2015**

**14 – 19 April 2015**

### **La luce di Carlo Moretti - classici e nuovi progetti**

Duvetica showroom, via Senato 41/a, Milan

### **The 2015 new Cristalli collections**

Carlo Moretti showroom, via della Spiga 48, Milan

On the occasion of the Salone Internazionale del Mobile 2015 and EuroLuce 2015, Carlo Moretti is presenting for the **first time a catalogue comprising both Carlo Moretti classic pieces**, some of which are new to the public, **and a range of new products** for contract-lighting and custom projects.

A selection of the pieces in the *Luce* Catalogue will be presented to the public during the Milan Design Week in the **Duvetica showroom in via Senato**, which was inaugurated last year as was the adjacent **Carlo Moretti shop in via della Spiga** where all the new 2015 *Cristalli* collections will be displayed from 14 to 19 April.

The **BOBLU** project has been set up in the entrance of the Duvetica space designed by the Tadao Ando Studio. The project's innovative interpretations have been developed by the Carlo Moretti design team together with Diego Chilò – one of the protagonists of contemporary lighting-design – following the tradition of the “artisan factory” founded by the brothers Carlo and Giovanni Moretti. **BOBLU** is a customizable system of sphere-shaped hanging lamps made of Murano crystal.

**BOBLU** is a return and a reinterpretation of the classic “sphere of light” theme. The single elements become part of a composition creating a veritable architecture of light with spheres of three different dimensions (10;14;18 cm diameters) in “white milk” glass, illuminated with Led lamps and in various colours. Each individual **BOBLU** sphere is unique; like all the Carlo Moretti crystals, the spheres are mouth-blown and hand decorated by master glass-blowers. Embellishments can be personalized and made to order. **BOBLU** offers design solutions that can be developed both horizontally and vertically, filling the spaces with unique scenographic elegance combining the brilliance of the spheres with a sinuous composition of suspended threads.

In the second venue, visitors will find the five lamp collections – some of which are new to the public – originated from Carlo and Giovanni Moretti's research and partly developed in collaboration with artist Paolo Martinuzzi. The *Dune*, *Isole*, *Lumina*, *Maree* and *Mito* collections include about twenty lights ranging from classic inspired pieces like *Bricola*, to the surprising and original designs of *Efra*, *Igra* and *Quati*, and to the imposing and almost sculptural *Drima*.
